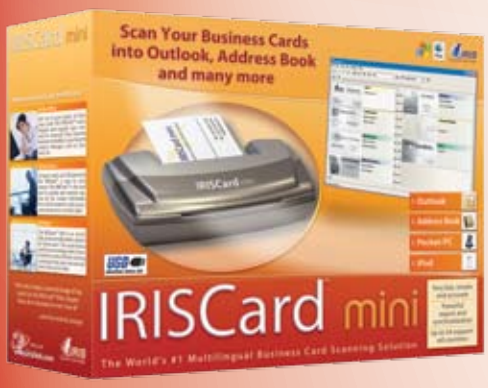
The World's #1 Multilingual Business Card Scanning Solution

IRISCard™ mini



Scan your business cards and update your contacts!

The IRISCard™ Mini is the best tool to convert your business cards into electronic contacts and to instantly export them to your contact manager.

Simple to install, small, portable, easy to use, the IRISCard™ Mini allows you to scan your business cards wherever you are. A simple plug and play in your USB port is enough to start scanning all your cards directly into Cardiris™ OCR software (provided). In a single click, all the data on your cards (first name, last name, company name, address, email, telephone numbers, cell phone number, faxes, etc.) is analyzed, extracted, captured and ready to be exported to Outlook, or your favorite contact manager.

Benefit now from the unbeatable advantage of having IRISCard™ Mini retype all your cards for you!

- Clean your desk: get rid of your stacks of business cards in seconds!
- Never lose a contact again!
- Quickly follow-up on all your leads!
- Easily share all your contacts!

Opportunities are just a scan away!

- Very Fast, Simple and Accurate
- Powerful Export and Synchronization
- Up to 54 supported countries
